SURGARD SYSTEM 5 RECEIVER

Watch Guard Company has installed Latest Receiver, Surgard System 5.

Surgard System 5 Receiver is designed to support three different communication medium connectivity's for alert transmissions. i.e Landline Connection, GSM Module and IP based system.

Landline & GSM alert signals transmission time has been reduced considerably from 30-45 seconds to 10-15 seconds.

Our Central Monitoring Station has developed three dimensional signal traffic facility i.e Land Line, GSM & IP based signals where no question of missing out on 24 hours alerts. The result of this innovation will have a long term effect on the security of the premises where BAMS are installed.

The recent study revealed that in a scenario where the BAMS wiring is cut either deliberately, accidentally or due to battery loss/power shutdown, earlier Control Room would not get any indication. In fact the system fault cannot be rectified unless physically checked. To overcome this obvious short coming, Watch Guard team incorporated an extra facility in which the Control Room will get automatic alert of "System Disabled" and team will be dispatched to re-connect the system in shortest possible time. This will also enable the Control Room to inform all concern of the situation so that any additional precautions if necessary can be taken.

Watch Guard Tech (Private) Limited

UAN: 051-111-777-177 Tel: 051-5504441, 051-8437527 Email: info@watchguard.pk www.watchguard.pk

IP Communicators

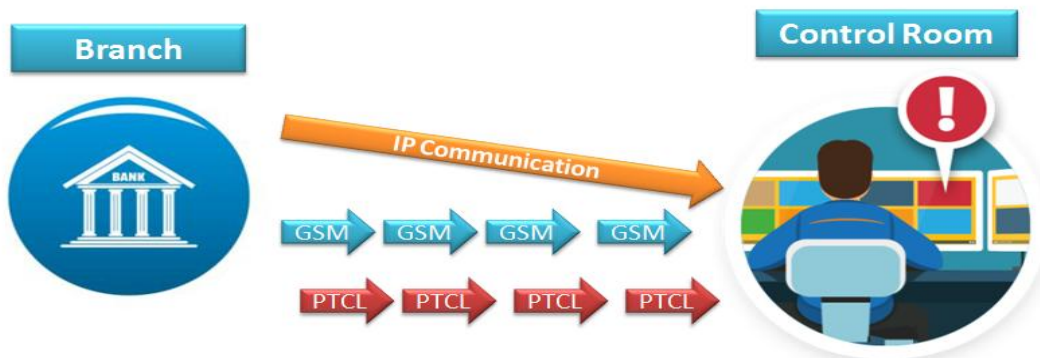

TL-260 can be used to transmit signals from branch to Central Monitoring Station; IP Communicator can be installed in the existing DSC system.

This device is able to transmit signals within 2-3 seconds over IP/Ethernet connection.

This device is 128 bit encrypted.

As existing Bentel BGS-220 GSM Module can also be used to transmit signals through IP therefore Data SIM is mandatory for communication.

Signal transmission time through TLE-260 = 2 Seconds

Signal transmission time through Bentel BGS-220 = 15-20 Seconds

CENTRAL MONITORING STATION

We also offer advanced 24/7 Central Monitoring Station. With the help of Rescue 15 & 1122, our Quick Response Force (QRF) is always ready to combat any type of intrusion so that the nature of the emergency can be evaluated. From here both the client and our Response Unit are intimated via SMS Alerts. Our call centre has highly trained staff members who work round the clock to ensure every query is entertained on time.

Quick Response Force (QRF)

Monitoring dramatically increases your level of protection. In case your alarm activates you cannot simply rely on your neighbors or people passing by to call the police. You need a third party to notify you immediately. This is where our Response Unit steps in to take charge of any type of situation.

SECURITIES ENSURE! IN COLLABORATION WITH RESCUE 15 & 1122

Watch Guard is proud of the fact that from the very start of its induction it has had the honor of working closely with Rescue 15 & 1122- the leading security force of Islamabad Capital Territory Police and Rawalpindi. Armed with the latest vehicles, our Security Staff is well aware of handling the most difficult situations

INSTALLATION TEAM

We pride ourselves of having an installation team of outstanding individuals who are committed to accept challenging responsibilities and development opportunities. Our specialized Installation teams are fully trained to make on spot decisions, deliver solutions to complex problems, and support products based on the guiding principles outlined by the company.

WHAT IS WATCH GUARD?

Watch Guard is a complete security solution provider; our product range includes GSM based Home/Office/Shop, Car security systems, CCTV, Video Surveillance system, Metal Detectors & Walk through Gates.

WHAT IS MEANT BY GSM CAR SECURITY SYSTEM?

Watch Guard Car Alarm is an anti-theft system provides security to your car/vehicle. You can control/monitor your car from anywhere, anytime through your mobile phone. The car will generate SMS alert & call onto your mobile phone, if any intruder tampers your car. Even, you can shut off the engine of your car in seconds through a single command.

WHAT IS GSM HOME/OFFICE/SHOP SECURITY ALARM SYSTEM?

Watch Guard Home Alarm System is an anti-theft system provides security to your Home/Office/Shop. You can control/monitor your home/office/shop from anywhere, anytime through your mobile phone. You will receive SMS alert & call on your mobile phone, if any intruder wants to enter into your home/office/shop. Our response unit force will reach at the emergency location within 15-20 minutes to counter the situation.

WHAT IS MEANT BY GSM BASED SYSTEM?

It means that you can monitor/control your home /office/shop or car by your mobile phone using GSM technology.

HOW THE SYSTEM DECLARES EMERGENCY?

Watch Guard anti theft system will be installed along with various type of sensors. In case of any interruption / disturbance, these sensors pass the signal to the base unit & the system will then declare emergency.

Watch Guard Tech (Private) Limited

Eamaan Tower, Commercial Market, Chaklala Scheme III, Rawalpindi

UAN: 051-111-777-177 Tel: 051-5504441, 051-8437527 Email: info@watchguard.pk www.watchguard.pk

WHAT HAPPENS IF THE SYSTEM ALARMS OR DECLARES EMERGENCY?

The system starts hooting & simultaneously sends SMS & calls onto the designated numbers and if you have subscribed for response unit services for your home/office/shop, then our security van along with police guards will move to your location to handle the situation.

WHAT WILL HAPPEN IF THE SYSTEM DETECTS GAS LEAKAGE OR FIRE?

The system will then declare emergency & act the same as mentioned above.

WHAT IS THE PROCESS OF GETTING THIS SYSTEM?

Please call us for survey of your premises, our team will propose you the required solution. You can get installed this system in next few days.

WHAT IS MEANT BY RESPONSE UNIT SERVICES?

Our security vans along with 15 Police guards are moving at various central locations 24/7 & if you want to subscribe this service, please contact us. Security is Ensured to you.

WHAT ARE THE CHARGES OF RESPONSE UNIT SERVICE?

We have designed two package plans for your convenience i.e. Yearly Advance Payment, Six Months Advance Payment.

HOW I WILL PAY YOU FOR WATCH GUARD SYSTEM?

Our survey team will get 50% advance payment at the time of survey & you will pay balance amount at the time of installation.

IS THERE ANY WARRANTY OF THIS SYSTEM?

We are offering 6 months warranty for Car/ Home/ Office/ shop security system. Standard warranty offered as per general electronics items.

IS THERE ANY CONTROL ROOM TO MONITOR SUCH KIND OF EMERGENCIES?

Yes, our control room is fully designed with the latest equipment used to ensure you maximum security. Our control room is online 24/7 to cater any emergency situation. In case of any suspicious action the control room checks the status and sends the response unit along with Police to the appropriate location.

WHAT IS THE ROLE OF POLICE IN WATCH GUARD?

Watch Guard has close coordination with Police. In case of any emergency, police and Watch Guard response unit will move towards the location and handle the situation.

THIS SYSTEM WILL WORK IN CASE OF POWER FAILURE?

Yes, this system has built in back up battery inside it.

CCTV SYSTEM

Watch Guard CCTV installations are designed and installed using the very latest technology. When deciding if you require a CCTV System, the decision should not be taken lightly and managing your system needs a lot of thought.

You need to think through how the images are going to be used. Perhaps you will record everything and just check the recordings when you need to, for example when you expect an offence has taken place. But the more you record, and the longer you keep the recordings for, the more equipment you will require.

The maximum should be 150 days, but you may decide that 24 hours is enough to meet your needs, the latter may be the case where you are monitoring the CCTV very closely and you are aware of what is going on, or where there is very little movement, for example if it is pointing at an exit and you would be likely to know very quickly whether it had been used or not. In some cases though you may not be aware that a crime has taken place until after the event, for example, a theft may only become apparent at the fortnightly stock take, or a fraud when the accounts are checked, in this case you may feel that a longer retention period is necessary.

CCTV is only as good as the person monitoring it, so the decision needs to be made as to whether there is a need for constant monitoring, or whether the system will be used as an events recorder. If there is to be constant monitoring, then a robust procedure needs to be introduced for the people monitoring the system on expectations and reactions should an event be captured. If the system is to be used as an events recorder then installing a digital recording system is advised for ease of use. It is also very important to consider lighting levels (or using infra-red cameras which can 'see' in the dark) and remember bad lighting can create a glare that renders the image useless.

The fact of the matter is that there is no shortcut to installing a quality system; you will require a good risk assessment and an appropriate specification to meet any needs that are identified. The best way of achieving the best possible outcome is to have a survey carried out. You will also have to take on board that if the cameras are to be looking over public areas then you must abide by the Data Protection Act and a link is provided to enable you to download the requirements.

CCTV Surveillance Systems

CCTV Surveillance Systems Since it's inception, Watch Guard Surveillance has successfully installed CCTV Systems across all industries and types of environments. These include Banks, Industrial Factories + Offices, Retail Outlets, Supermarkets, Office Blocks, shopping Centers, etc. All the surveillance systems installed & maintained by Watch Guard are Digital.

Conclusion

We are a professional company with the resources to meet the commitments given in this company profile. We custom build your CCTV Systems to specifications whether in Retail, Industrial, and Financial Sectors etc. Watch Guard can also interface your fire alarm system; special hazards fire protection systems and fire sprinkler systems into one interconnected network. This eliminated conflicting equipment and brings information into a single point to ensure maximum control. Watch Guard assures timely response to customer service, user-friendly equipment, top class technical support and an outstanding warranty and service plan.
